

Vacuum Safety Valve CVK SERIES

How To Order

CVK - A 01G

① Connect Direction
② Connect Thread

① Connect Direction <input type="checkbox"/>		② Connect Direction <input type="checkbox"/>	
A	External thread connection	01G	G1/8
B	Internal thread connection	02G	G1/4
		03G	G3/8
		04G	G1/2

Symbol

Features

- Aluminum shell, brass bottom, with filter.
- Used for several application occasion of vacuum system and prevent the influence to system if without touch workpiece or break away from the workpiece.
- Turn off the suction cup not used, reduce vacuum leakage.
- Use the same adsorption system to move the workpiece with different size and shape, the system can be used in different occasions.

Specification

Blowing pressure when break vacuum: 0.5Mpa

Item	Model	CVK-□ 01G	CVK-□ 02G	CVK-□ 03G	CVK-□ 04G
Suction Flow When Vacuum Level is 30kPa (L/min)		2.3	2.9	7.3	8.1
Suction Flow When Vacuum Level is 60kPa (L/min)		2.5	3.4	8.0	9.0
Max. Blowing Pressure When Break Vacuum (L/min)		310	340	590	790

Dimension

(mm)

External thread connect with suction cup

Internal thread connect with suction cup
