

Resin Attachment

Resin Attachment

Pad diameter $\varnothing 6, \varnothing 8, \varnothing 10, \varnothing 13, \varnothing 16, \varnothing 20, \varnothing 25, \varnothing 32$

■ No adsorption marks (rubber constituents) are left on workpieces

Direct contact between workpieces and the rubber can be avoided by mounting a PEEK attachment inside the bellows pad to prevent the transfer of rubber constituents.

■ Prevent the pad (rubber) from sticking to the workpieces

■ Ideal for the bellows pad ZP series ($\varnothing 6 \sim \varnothing 32$)
